## DETAILED ACTION

### *Allowable Subject Matter*

1. An "Amendment" was received on October 8, 2004 in response to Office Action of May 5, 2004.
2. Claims 1-38 are allowed.
3. The following is an examiner's statement of reasons for allowance:
4. With respect to independent claims 1, 12 and 23 prior art fails to disclose a method or apparatus for reducing ion contamination in an object carrying contamination introduced by ion milling step, the method comprising steps of defining a suspected ion contaminated area, and removing the area by a non-contaminating process, described below.
5. With respect to independent claims 32, prior art fails to disclose a system for milling an integrated circuit, the system comprising means for fast contaminated milling of the integrated circuit ( like, by directing a Gallium ion beam ), means for defining suspected ion contaminated area and means for non-contaminating removal of the suspected ion contaminated area. Conveniently, the non-contaminating process involves directing an electron beam toward the removed area while allowing the beam to interact with additional material. The additional material is usually in gaseous state and can be selected from a variety of prior art materials known for enhancing or allowing milling. After applying the non-contamination process, the system can cover

the milled hole by an electron beam enhanced deposition of different materials, including silicon.

Claims 2-11, 13-22 and 24-31 are allowed by virtue of their dependencies on the independent claims 1, 12, 23 and 32.

### ***Conclusion***

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments of Statement of Reasons for Allowance".

7. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
